Enr1601 program outputs section counts by site course and corresponding total enrollment for the term; for all the terms state-support and self-support classes. Section counts and enrollment are for at least the last 5 fall and spring terms. State-support classes are listed first followed by self-support. To find out the sections and enrollments for a particular course, perform a search (CTRL-F), enter the course prefix and number as the search argument for the course you are interested in knowing the counts for. Below are the site codes used ¶
